Efficiency & solvency benefit & profitability

Guaranteed Satisfaction

LS-1200 includes all the great and reliable innovations in an effective and 100% tested laser. These innovations solve the usual failures and technical stops that even nowadays other brands are suffering by forcing the capacity of their equipment.

Sapphire **is made in Spain and we offer our own technical support** all over the national territory with a response **within 72 hours.**

Satisfied with our laser

In addition we are quite sure that we are giving a solvent, effective and profitable answer that satisfies all the expectations that epilation market actually demands.
We are so sure about making a solvent, efficient and profitable solution that we offer different options of funding. This would ensure to the customer a perfect performance in more than **10 million shots**.

Leading Brand

International Excellence

The top selling high power diode Laser in 2015.

Great International presence and impact after its launch.

Spanish R&D in all its technology

Depilice® patented technology

Its cold unit inside the appliance lets you to maintain a operating temperature up to -7°C, so the patient can perceive the comfort, the protection and a poor feeling of pain.

Sapphire LS-1200 has no deposit or external element, making it easy to transport or to move.

Power and innovative Intensity

Its technology makes it unique, 1.200W. and 200A. **We eliminate the capacitors to deliver the energy in a direct and immediate way. Therefore, the load and unload times, which produce power losses, are notably reduced.**

As Sapphire LS-1200 is **really powerful,** it can offer different modes of working: **in short and long pulses or in burst mode** (FDP).

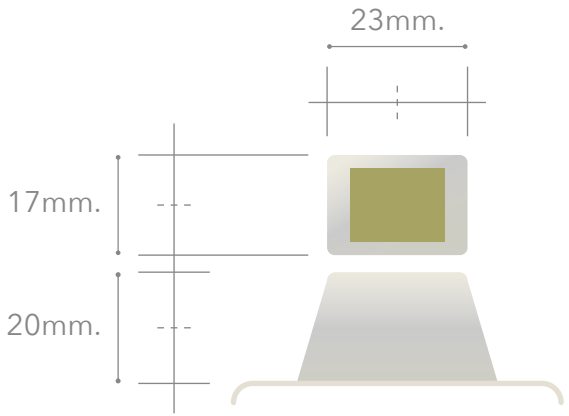

Redesigned hand piece

With an ergonomic design, it relaxes arm and hand muscle tension in long working days. Sapphire LS-1200 turns into a **lighter and more powerful hand piece** thanks to this new restyling (which includes only 6 standard German diodes bars with a total of 1200 W).

Its new **higher and pyramidal tip** enables you a **better access to different areas** and optimizes the cold circuit getting a operating temperature up to -7°C.

You decide what mode & what work settings you need for each Sapphire treatment

Because nobody better than you knows your customer´s skin and hair, with Sapphire you set the shot parameters to maximize the efficiency and safety in customized treatments

It comes with a 10" Touch Screen LCD colourful monitor preset to treat the more generic phototypes.

Its (optional) remote connection records use statistics and the session and total (annual) shots.

In addition, Sapphire LS-1200 **allows more advanced and demanding users to control all the shot settings** in order to get smart sessionsto each type of skin and hair as **quickly, safely and accurately as possible, even with the use of gloves**

Modes of working
Quick selection of the different shooting modes.

Shortsweep
Longsweep
15, 30, 100 y 400 ms. pulses

Temperature
Real time display of tip temperature

Up to -7° C.

Fluence
Simple and immediate setting of the amount of energy applied to each shot.

Power from 1 J/cm^2
up to 60 J/cm^2

Frequency
Election of the appropiate hertzs according to the selected working mode.

Speed from 1 Hz.
up to 15 Hz.

EFFECTIVE IN **4-6** SESSIONS

Visible results since the First Session

It depilates wathever customer's Fitzpatrick scale

Sapphire LS-1200 works in **short pulses of 15 and 30 milliseconds**, below the thermal relaxation time of the hair in order to get a thermal damage in the germ cells which are responsible for the hair growth. TThe efficiency is the same, although we should to increase the number of sessions with high melanin density skins (types IV, V and VI in Fitzpatrick scale) in which we will work in **long pulses, from 100 to 400 milliseconds.**

Type I	Type II	Type III	Type IV	Type V	Type VI
Very white skin	White skin	Fair Brunette Skin	Tanned Brunette Skin	Very Dark Skin	Black Skin

Quality and Excellence

Sapphire ISO 13485

Quality management in ISO 13485 sanitary products

The safe use of a sanitary product is strongly regulated by CE Mark in a similar way to some industrial or construction products.

According to this regulation, ISO 13485 certification is an accepted mechanism of consent with the essential requirements of the product.

Description

ISO 13485 regulation is based on the ISO 9001 regulation (with the same structure and a lot of requirements) but it includes "the satisfaction of the customer" and "the constant improvement of the product". In addition, it incorporates extra demands (such as design, control of the records, critical processes, traceability, sterilization processes, or risk management) to accomplish legal requirements of the sanitary sector.

This is an applicable regulation to any organization that supplies sanitary products. The aim is "to prove the organization capacity to supply sanitary products and related services with the customer' requirements and the obligatory sanitary' requirements". It is possible to include it in the ISO 9001 regulation because it is though as a tool to maintain the efficiency and the effectiveness of the processes more than a model of business.

Area of Applicability

The certification of this regulation is applicable to all type of organizations that participate in the activities of design, manufacture, packaging, packing, writing and translation of instruction manuals, advertising, sale, distribution, formation for the use, and installation and maintenance.

Area of world application

ADVANTATGES & BENEFITS

To the own organization

- Fulfilment of all the regulation requirements applicable to sanitary products and related services.
- Loyalty of the customer because of the confidence that involves this certification.
- Total control of the production and final destination of the products.
- Access to new d**omestic and international** markets.

To customers

- Increase of the loyalty by proving that **the customer satisfaction** is the main priority of the company.
- Working in agreement to a standard recognized in the market.
- Improving the result of the product and the service that the customer receives.

To the market

- Confidence in the organizations that supply sanitary products and therefore in the own supplied product.

CE Mark

CE Mark representation.

The CE Mark comes from French and it means "Conformité Européene" or European Consent. It is a European brand to certain groups of services or industrial products.

Sapphire

It was established by the European Community and it testifies that the product has the legal and technical security requirements of the European Union.

The CE Mark must be in a product if it is accessible to the 20 guidelines called "New Approach" and if it can be sold out to the European Union countries. So if the product fulfils the European guidelines and it has the CE Mark, the member countries cannot prohibit, restrict or prevent the placement on the market. The CE Mark can be considered as a passport to trade a product in European Union countries.

MEANING

Since 1993, the CE Mark has been an indicator of the product consent with the EU legislation and it has allowed the free traffic of products in the European market. Adding the CE Mark to a product, the manufacturer is in accordance with the legal requirements and he guarantees the product validity to be sold in the European Economic Area (EEA includes the 27 member countries of the EU and some EFTA countries as Norway, Iceland and Liechtenstein) and Turkey. This is also valid for manufactured products in other countries that sell in EEA and Turkey.
